

## Product Information

« Performs burn-in testing and quality audits—dynamic maximum system load test completes 10 days of conventional burn-in testing in only 24 hours »

**PC-Doctor Factory is the complete diagnostic solution for PC manufacturers and assemblers, as well as service centers and repair depots. Designed for the rigorous demands of both manufacturing and service environments, PC-Doctor Factory streamlines processes from incoming inspection to final systems test using industry-leading hardware diagnostics and system information tools. PC-Doctor Factory dramatically improves product quality, reduces troubleshooting time, and substantially reduces cost.**

- Ensures that each PC is built exactly as it was ordered
- Performs burn-in testing and quality audits—dynamic maximum system load test completes 10 days of conventional burn-in testing in only 24 hours
- Easily integrates support for emerging standards in hardware development
- Easily automates testing through test scripts and command line capabilities
- Provides the flexibility for users to integrate their own diagnostics using the PC-Doctor Diagnostic Application Programming Interface (DAPI)

## Manufacturing Environment

- Tests incoming parts and subassemblies
- Conducts burn-in testing for headless units
- Confirms correct system configuration
- Ensures systems are free of defects before delivery

## Service and Repair Centers

- Identifies changes in system configurations
- Improves first-time fix rates
- Quickly differentiates hardware problems from software problems
- Confirms that repaired systems are correctly configured
- Ensures repaired systems are free of defects before return to owners

PC-Doctor provides comprehensive post-sale support services to ease implementation and help you maximize efficiency and savings.

## Key Features

- Functions in stand-alone test environment in DOS, Windows, and Linux
- Reduces Out Of Box Failure (OOBF) rates by thoroughly testing components and entire systems
- Increases customer satisfaction and brand value
