

## Product Information

« Scalable solutions from single production line subsystem makers to global system manufacturers »

**PC-Doctor Network Factory converts PC testing into a dynamic engine of information sharing. Networking the test and validation process expedites borderless sharing of system information across internal (manufacturing, engineering, supply chain, sales, service, and support,) and external (customer, supplier, reseller, and IT service) organizations. By combining PC-Doctor diagnostics with network computing technology, PC-Doctor Network Factory offers unmatched flexibility, scalability, sustainability and value.**

- Data capture creates and archives product birth certificates including detail to the subsystem and component levels
- Web-based test management interface provides anytime, anywhere access to real-time test and system data for authorized users
- User access controls maintain secure, user-appropriate access to test data and solution resources
- Integrates Windows-compatible server-based application software, SQL-compliant database, XML formatted information and reports, and Web browser user interface
- Integrates with and strengthens ISO and Six Sigma best practice-based manufacturing programs
- Customizable simulations and interactive training course provide training and reference for manufacturing floor technicians and administrators

- Detailed system information displayed in an easy-to-read format
- More than 350 test functions available through PC-Doctor's unique Modular Core Technology (MCT™)
- Current testing and system information libraries are constantly updated and upgraded by PC-Doctor as PC technology advances
- Flexible environment that offers complete diagnostic support for all stages of the PC life-cycle

## Key Features

- Runs on a wide variety of server, storage, and networking hardware infrastructures
- Tests and provides detailed system information on a wide variety of PCs, servers, and PC-related hardware
- Scalable solutions from single production line subsystem makers to global system manufacturers

## Benefits

- Lowers service, support and warranty costs throughout the lifecycle
- Reduces Out Of Box Failures (OOBFs)
- Creates test, diagnostic, and system information capture solutions
- Enables rapid reconfiguration of test programs
- Retains and archives information that may later be required for legal discovery in product liability, contract, patent and other disputes
- Ensures that each PC is built exactly as it was ordered

## Product Deliverables

- PC-Doctor test and diagnostic libraries
- PC-Doctor test scripting and configuration tools
- PC-Doctor Network Factory server-based application software
- PC-Doctor Network Factory database application software
- Monitoring console user interface software
- Product documentation
- Optional solution development, implementation and maintenance consulting services

- IT service providers, service and support organizations
- Retailers and resellers

## Sales and Service Contacts

For pre-sales inquiries and additional product information, e-mail [nf5.sales@pc-doctor.com](mailto:nf5.sales@pc-doctor.com)

## Key User Communities

- PC technology-based manufacturers and OEMs from component/subsystem makers to global multinationals
- Name-brand PC product suppliers sourcing from OEMs and contract manufacturers
- System integrators, system builders, VARs
